## **Basic Obedience & Good Manners**

A six week basic Obedience course in which you will learn to teach your dog to respond to the following commands; **SIT, DOWN, STAND, COME, and HEEL.**

Hand signals will also be introduced.

As you begin learning to train your dog, you will be taught how to **PET, PRAISE, and CORRECT** your dog. The amount of success you achieve in training your dog will be determined by how consistently you combine these three techniques. Remember no matter what level of advance achievement your dog attains, he must begin with a firm foundation in Basic Obedience.

Puppies as young as twelve weeks old can be ready for basic obedience class, and no dog is ever too old to participate in obedience training, as long as they are healthy. Let's not forget, however, that even though training your dog is fun and rewarding, it is also hard work. Dog Training requires a unique type of commitment from you, including confidence, responsibility, and mutual respect with your dog.

## **Intermediate Obedience Training**

This class is a continuation of the socialization and primary commands learned in Basic Obedience. The new focus of this class is on using hand signals and verbal commands to complete your dog's training. This class meets once a week.
